The 4th CBF-103 Assignments

Part 1 Biochemistry

1) **Define glycolysis and state its cellular location.**

.....
.....
.....
.....

2) **Name the three key regulatory enzymes of glycolysis.**

.....
.....
.....
.....

3) **Briefly describe the effects of insulin and glucagon on glycolysis.**

.....
.....
.....
.....
.....

4) **Enumerate the biological importance of glycolysis.**

.....
.....
.....
.....
.....

5) **Calculate the net ATP yield of anaerobic glycolysis per 1 molecule of glucose. (Illustrate consumed, gained, and net ATP).**

.....
.....
.....
.....
.....
.....

6) **Enumerate three benefits of Lactose in human Mils**

.....
.....
.....

7) **Enumerate Two clinical value of Hyaluronidase enzyme**

.....
.....

The 4th CBF-103 Assignments

Part 2 Physiology

1. **Define Simple Diffusion and enumerate 3 factors that affect its rate.**

2. **Enumerate the three types of gated ion channels based on what opens them.**

3. **Define Osmosis and Osmotic Pressure.**

4. **Compare between uniport, symport, and antiport.**

☐ **"I acknowledge and agree to the use of Artificial Intelligence (AI) tools for the grading and evaluation of my assignments, with the understanding that this process is conducted under the supervision of the academic staff."**
